

Thank you for your interest in The Eye Institute and all of the vision correction procedures that we offer.

The Eye Institute of Utah, established in 1980, is known throughout the Intermountain West as a leader in the eye care industry, specializing in cataract, cosmetic and refractive surgeries including LASIK, PRK and refractive lens implants (ReSTOR, ReZoom, Crystalens and the Visian ICL). These advanced vision correction procedures are proven to be effective methods of restoring vision as well as potentially enhancing your lifestyle if you have nearsightedness, farsightedness, astigmatism and presbyopia.

Your next step is scheduling a complimentary pre-surgical refractive consultation. This extensive examination will determine the vision correction procedure that is right for you. During your visit we will perform a number of tests to determine if you are a good candidate for refractive surgery. We will check your current prescription and map the shape and thickness of your cornea. This comprehensive exam is free of charge. Please plan on spending approximately 1½-2 hours with us for this important testing. Your eyes will be dilated, but this should not interfere with your ability to drive home.

**If you wear contact lenses please follow the instructions below:**

- **Soft contact lenses** must be removed at least **7 days prior to the exam.**
- **Hard/gas permeable contact lenses** must be removed for **3 weeks prior to the exam.**

If you desire to finance your vision correction procedure, we have very affordable payment options available, including 24 months, no interest plans. We also accept all credit cards, flex medical spending accounts and cafeteria plans.

Should you have further questions regarding our services or your appointment, please contact our representatives at **801-266-2283** or toll free at **1-800-987-EYES**. You can also visit our website at **[www.theeyeinstitute.com](http://www.theeyeinstitute.com)**.
